Programming and web development is one of my biggest passions. I professionally work as frontend developer since 2021. I work with frameworks such as React, Angular and Vue and use libraries like Styled Components. I am a responsible, well organized person and I always strive to develop my skills and knowledge. One of my interests are Smart Home systems, so in my free time I learn Docker and using Linux as a server. I feel great working as Frontend Developer and I try to constantly learn and improve

- English: intermediate
- Polish: native

01. EXPERIENCE

11.2021 - now

Frontend Developer
Clurgo / Lublin

I work in a team of developers, implementing various web applications and websides. I develop and implement features, analyze and test software and fix bugs and other problems. I work in frameworks such as React, Angular, Vue. In my daily work I cooperate with various teams, like UI/UX design, testers and backend developers.

01.2020 - 10.2020

Webmaster
M-production / Lublin

As a webmaster I was responsible for making sure that the company's website runs smoothly and is bug-free. I verified if it was operating correctly and had the latest information. I also designed and implemented new simple landing pages for shor-term events or marketing purposes.

02. EDUCATION

10.2023 - now

WSEI University
Bachelor of Computer Science Engineering / Lublin

03. PROJECTS

2021

Application for a postal service company

I was in a team developing an application for communication between postal service company and micro and small businesses

2022

Application for data management for a media company

I was in a team developing an application for a data managment, my main task was to maintain the application and fix any bugs and problems during production

2022

Translation plugin for content management application

I was developing a plugin for content management. I created features that allowed users to manage their data and it's usage.

2023-2024

Application for applying and managing loans for a bank

I was the main frontend developer, responsible for the whole frontend site of the project. I was implementing various new and updated features, updating framework and working closely with testers to fix any issues during production

2024

Fitness tracking application

I was working on an application for tracking fitness exercises and progress. I was designing and implementing new features and new solutions to problems, and I was heavily involved in creating custom tests.
